

CASE STUDY

Cloud based Point of Sale (POS) development for a global hardware manufacturer and supplier

The Client

20 years old one of the well-known POS hardware manufacturers and suppliers in Asia-Pacific region having offices in USA, Australia, New Zealand, Singapore, Malaysia, Mauritius, India, and Middle Eastern Countries. Our client's POS hardware are used in large banks and world's top retail chains.

Cloud based Point of Sale (POS) development for a global hardware manufacturer and supplier

Business Situation

The client was looking for an Online cloud-based POS system that could be customized with the POS hardware device manufactured by them. The client's requirement was to build a system that could address all the areas of concern where their devices are installed. A common interface to handle sales, purchase, products, inventory, customers, staff, accounts and reports.

The Challenges

Identification and aligning the processes into fine modules and understanding the connectivity was a challenge. The system must keep track of each and everything -

- Invoice raised for purchase, material inward to inventory tracking
- Product descriptions, sales invoice to customers loyalty points
- Employee Management, payroll to accounts
- Banking, journals, assets and liabilities

The Solution

Briskon developed an Online cloud-based POS system in line with the client's requirement following a neatly defined agile project plan. Modules were designed, developed, deployed and tested in a real-time environment. Client's involvement enhanced our productivity and we walked through a win-win situation.

Key features captured with solution:

- Multi store/franchise management
- Multi user running on multiple devices
- Interfaces/ communicates with POS peripheral
- Online connectivity with payment gateways
- Product Management
- Inventory Management
- Sales
- Discount sale
- Purchases
- Customer Management
- Staff Management
- Leave management
- Payroll processing and accounting
- Superannuation/EPF accounts and payments

Cloud based Point of Sale (POS) development for a global hardware manufacturer and supplier

The Benefits

- Simplified accounting process
- Inventory management, tracking bigger sells and identifying reorder point is one click away
- Easy to track employees with multiple pay run system
- Generate error-free purchase/sales invoices
- Fast processing of discount sales
- Better resource utilization
- Increase revenue

About Briskon

Founded in 2005, Briskon is a global software application development, mobile apps development, digital transformation and web development company operates from Dallas, Texas and Bangalore.

Briskon is a highly process driven organization with extensive experience of working with great companies. The young and vibrant team of Briskon consists of highly skilled managers, analysts, designers, developers and QA personnel, working together we deliver world-class quality products and solutions.
