

*Working together to get IT right*

# Highly scalable online portal automating major processes for a reputed business school

## The client

16 years old, one of the top business schools in India providing management education in finance and international business ranging from graduation to PhD.

## Business situation

The client was serving students manually right from admission test & interview to registration. Post registration, a very few processes were being handled by a stand alone nearly obsolete system. Recently the client extended management education to graduate level. Due to increased number of activities, with limited number of people, manual system was not an ideal choice to go with. Client approached Briskon for a new online system.

## The challenges

Understanding all the processes while communicating to all departments and drawing a roadmap such that all the stakeholders get benefited with a centralized system. The system must serve prospective candidates, current students, newly joined students, faculties, alumni, parents, other corporate and job seekers with a single online application. The application has to be robust and scalable to accommodate additional functionalities and features with growing volume of users.

# Highly scalable online portal automating major processes for a reputed business school

## The solutions

Briskon developed an internet based centralized robust application provides automated functionalities pertaining to admission, scheduling GD/PI Interview, parent's ward awareness, attendance, result, student performance, alumni & corporate interaction, job submission etc.

### Important features captured with solution:

- Online application form submission:
- Automation of admission process - divided into four stages as application verification, scheduling
- GD/PI, GD/PI results and joining letter.
- Fee management
- Comprehensive discussion board
- Online class routine and task manager
- Online exam results and attendance
- Alumni connect
- Corporate interaction
- Publishing jobs online

## The benefits

- Centralized database connecting all the stakeholders
- Ease of work
- Better student – faculty interaction
- Handling large number of candidates
- Error free better record maintenance
